

Are you a caregiver of a young child waiting for autism diagnosis or services?

Help improve support for families like yours! Researchers at UT Austin, Baylor University, University of Maryland are developing a program to better support families during wait times for autism diagnostic evaluations.

Who can participate?

- Primary caregivers of a child age 0-5 waiting for an autism diagnosis or services
- You will receive \$25 for completing the intake session, \$25 for post-study, \$25 for follow-up survey
- You will be randomly assigned to 1 of 3 conditions

What will you do?

- Complete an intake assessment with the research team to select online modules together
- Complete online training on a weekly basis at home for 10 weeks
- Complete follow-up survey and/or interviews
